Description:

Turnover time for all repairs:

Same day if it can't be replaced or repaired. We install a loan unit until your unit is repaired. Excluding gearbox repairs.

Although we service most gate motors we supply and install the above-mentioned motors, from new installations to swapping out old irreparable motors, with new motors or services exchange units.

Gate motors are an essential part of domestic and commercial safety. It controls the entry and exit capability of residential and commercial areas. When a gate motor is out of order it is a high security and safety risk.

Electric Fencing:

- Nemtek
- Zone identification
- Issuing of C.O.C for fence
- Electric fence repair and new:
- Stain less steel wire new and repair
- Galvanised wire new and repair
- All makes of tensioners
- Repainting of steel up wrights
- Replacing all makes of up wrights
- Replacing of Ht cable

Description:

We install electric fence systems: From the normal top of the wall electric fence to the more advanced free-standing systems and custom design, for domestic, commercial and industrial sites and zone control.

These systems offer you a peace of mind and are the first step towards safeguarding any area. These systems are designed to warn you timelessly as well as repelling intruders. Linked to any alarm system or armed response service, these systems prevent anyone to enter your property unannounced.

Intercoms:

- BPT
- Commax
- A-phone (GF – MK Unit)
- Mircom II
- Centurion G-Speak & G-Ultra

We install a wide variety of intercoms to suite the need of the client, from the normal household all the way through to the apartments, townhouses, clusters and office parks. The Commax systems are designed as a more cost-effective system. Eg: single application from the gate into the guard room. For a more advanced system the BPT intercom are designed for your bigger systems such as: apartments and town houses. Mircom is the latest in intercom technology. Its capability of working wirelessly, through the telecoms networks reducing the risk of failure in the system, due to this the tenant has got the capability of communicating with his/her visitor without being in the unit.

Access Control:

- Impro
- Prox lock
- ZK Software (biometric)

Menu-driven dashboard display. Embedded fingerprint tool for registration and Uploading templates to the terminals.
Quick start links for common operations. Individual door configuration for unlock Duration, Wiegand format and request to exit mode.
Programming of duress password. Real-Time event monitoring with door status icon
Photo pop-ups of users and visual verification. Remote opening / closing of an individual or all doors. Reports with customised search engine.

Complete range of:

- Keypads
- Maglocks
- Strikers
- Access booms
- Cronolog

The ZK Reader restrict access to sensitive areas, and effectively manage employee movements, therefore reducing the risk of theft.

Alarms:

- DSC
- DSC NEO WIRELESS
- PARADOX
- IDS
- AJAX ALARMS

Supply, Install & Repairs

CCTV:

- IP Cameras
- NVR 4 / 8 / 16 / 18 / 32 and 64 Channels available

We do from your basic systems of monitoring a certain area, to your more advanced systems, where the recording is marked by time and date as well as, monitoring of vehicles entering and exiting certain areas. Able to link and take snap shots of person near your fence or entering a 'no entry' zone, which get emailed direct to phone or PC.

CCTV is an outstanding deterrent and ensures enhanced safety in areas where the security of staff, customers and assets is paramount. Highly cost effective compared to man guarding with integrated security platforms leveraging the latest technologies. CCTV oversees and controls all access to a site, including stock, deliveries, staff and customers.

Garage Doors:

- Digidoor
- Centurion
- ET Systems

We install any type of garage door but only use the abovementioned to automate the doors.

Installations of:

- Inverters
- Lithium-ion Batteries
- Solar panels
